

PRODUCT POSITIONING

Our best selling approach shoe, the Crux® has earned it's market leading reputation over the years by being a no-nonsense, do-it-all model that is super versatile. The suede upper is durable and supportive, and features an extended rubber toe rand for extra protection and friction. The Vibram® outsole features sticky Megagrip rubber and a climbing zone for outstanding performance on rock. To-the-toe lacing allows for great fit versatility, from more technical to more casual use, allowing the Crux® to traverse crag, trail and town with ease. Whatever your day has in store, the Crux® has you covered.

W 72053/352.8

FEATURES AND BENEFITS

- 01** **Upper:** Water-repellent suede with Heel Tension that offers improved lateral support for the foot when walking
- 02** **Rand:** Protective rubber toe rand for increased protection, friction and durability
- 03** **Lacing System:** Lacing system extends to the toe for fit versatility
- 04** **Midsole:** Dual density midsole provides the perfect blend of support and cushioning
- 05** **Outsole:** Vibram® outsole with Megagrip rubber compound offers excellent grip on both dry and wet terrains while maintaining a high level of durability

SPECIFICATIONS

- Upper: 1.8mm Suede + Polyester Mesh (PFAS Free)
- Lining: Recycled Polyester
- Insole: 70% Recycled Polypropylene
- Midsole: 2D EVA MP
- Outsole: Vibram® Vertical Approach / Megagrip
- Last: **(M)** BN
(W) BN
- Sizes: **(M)** 40-47 (½ sizes), 48 (whole sizes)
(W) 36-42 (½ sizes)
- Weight: **(M)** 383g; 13.4oz (½ pair, size 42)
(W) 326g; 11.4oz (½ pair, size 38)
- Origin: Vietnam

TECHNOLOGIES

TECHNOLOGY · MATERIALS · CONSTRUCTION

Vibram® Vertical Approach Sole – The outsole is molded in Megagrip rubber, with 4mm deep lugs designed with specific inclinations and angles to provide optimal traction, propulsion and braking, and features lateral grooves in the forefoot to enhance sole flex. The medial forefoot features an edging zone, providing more rubber contact with the rock under the big toe.

Vibram® Megagrip Rubber – Vibram® Megagrip rubber compound was developed for the most demanding conditions, where grip and friction take priority. Formulated specifically to perform in both wet and dry conditions, Megagrip rubber offers increased friction, with minimal reduction in durability. Megagrip is the ideal rubber compound for demanding activities such as trail running, approach, hiking and canyoneering.

Midsole – Dual-density EVA featuring a medium density EVA base that provides structure and stability, with low density EVA top layer for added cushioning. A board-lasted construction provides optimal support and stiffness.

SCARPA Planet Friendly – Our products tread the most wonderful and unspoiled landscapes on earth. We feel we must do our best to preserve these landscapes. "Planet Friendly", products made of environment-friendly materials refer to products in which materials and processes are specifically chosen for their environmentally friendly characteristics.

ACTIV *impact* TECHNOLOGY

ACTIVimpact Technology – ACTIVimpact is a technology applied to the soles construction that uses materials with physical and chemical characteristics that absorb negative impacts with the ground and increase shock-absorbing features exploiting the utmost energy used during the activity.
